

PREVENTIVE HEALTH CARE SERVICES GUIDELINE | 2019

Dear Provider,

First Medical Health Plan, Inc., (First Medical) is a company at the service of our community. For over forty (40) years, First Medical has dedicated its efforts to improving the quality of life of our plan participants through the planning and implementation of medical services coverage of the highest quality in a cost-effective manner. Our services are rendered based on the great commitment of excellence and the human warmth that characterizes its relations with our providers. Because, when our enrollees are healthy, they can live a better life. Therefore, we have developed these Preventive Services Health Care Guidelines to provide assistance interpreting certain standards benefit plans and to ensure that our network providers meet all relevant requirements mandated by the Centers for Medicare & Medicaid Services (CMS), Puerto Rico Health Insurance Administration (PRHIA), and the Office of Insurance Commissioner, among others.

When deciding coverage, the enrollee specific document must be referenced. The terms of an enrollee's benefit coverage may differ from the standard benefit plans upon which this guideline is based. In the event of a conflict, the enrollee's specific benefit document supersedes these guidelines. We highly recommend validating enrollee's eligibility, any federal or state regulatory requirements and the plan benefit coverage prior to use of this guideline. **Remember that the preventive services are exempt from the cost sharing, such as co-insurance, deductibles or co-payments.**

First Medical reserves the right, in its sole discretion, to modify its coverage determination guidelines and medical policies as necessary. This Coverage Determination Guideline does not constitute medical advice. First Medical may also use tools developed by third parties to assist us in administering health benefits, in connection with the independent professional medical judgment of a qualified health care provider and do not constitute the practice of medicine or medical advice. You can access this guide in electronic form, on our website: www.firstmedicalpr.com.

Coverage Rationale

Preventive Services:

This term applies to health care services routine that includes screenings, check-ups, and patient counseling to prevent illnesses, disease, or other health related problems. Preventive services are intended to help people remain healthy and to detect any health-related problems early while there is a better chance of recovery. We highly recommend our plan participants to visit their doctor for regular check-ups, even if they feel healthy, to perform disease screening, identify risk factors for disease, discuss tips for a healthy and balanced lifestyle, stay up to date with immunizations and boosters.

Plan participants will not have to pay a copayment or coinsurance if service is provided by in-network providers.

Covered preventive services for adults, women and children are free when it is completed by an in-network provider and is done for preventive purposes or diagnosis care. Therefore, plan participants will not have to pay a copayment or coinsurance if service is provided by in-network providers. Before using this guideline, please check the enrollee specific benefit document and any federal or state mandates, if applicable.

Summary of Preventive Care Services Benefit

Preventive services may take place at the primary, secondary, and tertiary prevention levels. The following is a high-level summary of the services covered under the Preventive Care Services benefit (broken down by age/gender groups):

Coverage Limitations and Exclusions

1. Services not covered under the preventive care benefit may be covered under another portion of the medical benefit plan. Please refer to enrollee specific plan document for details.
2. Generally, the costs of drugs, medications, vitamins, supplements, or over the counter items are not eligible as a preventive care benefit. However, certain outpatient prescription medications, tobacco cessation drugs and/or over the counter items, as required by PPACA, may be covered under the preventive benefit. For details, please refer to enrollee specific plan document.
3. An immunization is not covered if, it does not meet company Vaccine Policy requirements for FDA labeling (including age and/or gender limitations) and, if does not have definitive ACIP recommendations published in the CDC's Morbidity and Mortality Weekly Report (MMWR).
4. Examinations, screenings, testing, or immunizations are not covered when:
 - a. Required solely for career, education, sports or camp, travel (including travel immunizations), employment, insurance, marriage or adoption purposes, or
 - b. Related to legal or administrative proceedings , or
 - c. For medical research purposes, or
 - d. Required to obtain or maintain a license of any type.
5. Services that are research studies, experimental, unproven or not medically necessary are not covered.
6. Breastfeeding equipment and supplies not listed in the benefit coverage of plan participants.

Travel Immunizations:

Immunizations that are specific to **travel** (e.g. typhoid, yellow fever, cholera, among others) are not required by PPACA and are excluded from coverage. However, travel immunizations may be available as a buy-up coverage option on certain benefit coverage. Please refer to enrollee specific plan document for details.

Definitions

- United States Preventive Services Task Force (USPSTF): an independent, volunteer panel of national experts in disease prevention and evidence-based medicine. The Task Force works to improve the health of all Americans by making evidence-based recommendations about clinical preventive services. <https://www.uspreventiveservicestaskforce.org/Page/Name/home>.
- Patient Protection and Affordable Care Act (PPACA): is the first part of the comprehensive health care reform law enacted on March 23, 2010. The law was amended by the Health Care and Education Reconciliation Act on March 30, 2010. The name “Affordable Care Act” is usually used to refer to the final, amended version of the law. (Also known as “PPACA”, “ACA”, or “Obamacare.”) The law provides numerous rights and protections that make health coverage more fair and easy to understand, along with subsidies (through “premium tax credits” and “cost-sharing reductions”) to make it more affordable. <https://www.healthcare.gov/glossary/patient-protection-and-affordable-care-act/>.
- Advisory Committee on Immunization Practices (ACIP): a committee that comprises medical and public health experts who develop recommendations on the use of vaccines and related biological products in the civilian population of the United States. ACIP was established under Section 222 of the Public Health Service Act (42 U.S.C. § 217a) and is governed by its charter. <https://www.cdc.gov/vaccines/acip/about.html>
- U.S. Department of Health and Human Services (HHS): a federal agency that administers more than 100 programs across its operating divisions. Its mission is to enhance and protect the health and well-being of all Americans and provide essential human services, especially for those who are least able to help themselves. The mission of the Health & Human Services (HHS) HHS is to provide for effective health and human services and fostering advances in medicine, public health, and social services. <https://www.hhs.gov/about/index.html>
- Health Resources and Services Administration (HRSA): an agency of the U.S. Department of Health and Human Services (HHS), that provides health care to people who are geographically isolated and/or economically or medically vulnerable. This includes people living with HIV/AIDS, pregnant women, mothers and their families, and those otherwise unable to access high quality health care. <https://www.hrsa.gov/about/organization/bureaus/index.html>
- Modifier 33: when the primary purpose of the service is to deliver an evidence based on service in accordance with the US Preventive Services Task Force A or B rating in effect and other

preventive services identified in preventive services mandates (legislative or regulatory), the service may be identified by adding 33 to the procedure. For separately reported services specifically identified as preventive, the modifier should not be used. Please refer to the Applicable Codes section below for more information about Modifier 33.

Applicable Codes

The codes listed in this guideline are for reference purposes only. Listing of a service code in this guideline does not imply that the service described by this code is a covered or non-covered health service. Coverage is determined by the enrollee specific benefit document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claims payment. Other policies and coverage determination guidelines may apply.

Modifier 33:

First Medical considers the procedures and diagnostic codes and Claims Edit Criteria listed in the table below in determining whether preventive care benefits apply. While modifier 33 may be reported, it is not used in making preventive care benefit determinations.

ICD-10 Codes:

Effective October 1, 2015, the Centers for Medicare & Medicaid Services (CMS) implemented ICD-10-CM (diagnoses) and ICD-10-PCS (inpatient procedures), replacing the ICD-9-CM diagnosis and procedure code sets. *ICD-9 codes are not accepted for services provided on or after October 1, 2015.*

ICD-10-CM (diagnoses) and ICD-10-PCS (inpatient procedures) must be used to report services provided on or after October 1, 2015.

APPENDICES

Preventive Immunizations

An immunization (vaccine) that does not fall under one of the exclusions in the Certificate of Coverage is considered covered after the following conditions are satisfied:

- (1) FDA approval; or
- (2) Explicit ACIP recommendation published in the Morbidity & Mortality Weekly Report (MMWR) of the CDC. Implementation will typically occur within 60 days after publication in the MMWR. In the case of a public health emergency (as defined by the CDC or local public health departments).

First Medical may choose to apply preventive benefits to a new vaccine if the vaccine has FDA approval, even if an ACIP recommendation has not been announced.

NOTE:

- Trade Name(s) column: brand names/trade names are included, when available, **as examples** for convenience only. Coverage pursuant to this Coverage Determination Guideline is based solely on the procedure codes.
- Age Group column: This column is provided for **informational use only**. For purposes of this document: Adult means 18 years of age and up; Pediatric means 0-18 years of age.
- Benefit Limits column: Benefit Limits in bold text are from FDA labeling and ACIP recommendations. Codes that indicate “For applicable age see code description” are limited to the age(s) listed in the code description.

USPSTF Grade Definitions

What does grade means and suggestions for practice?

The USPSTF updated its definition of and suggestions for practice for the grade C recommendation. This new definition applies to USPSTF recommendations voted on after July 2012. Describing the strength of a recommendation is an important part of communicating its importance to clinicians and other users. Although most of the grade definitions have evolved since the USPSTF first began, none has changed more noticeably than the definition of a C recommendation, which has undergone three major revisions since 1998. Despite these revisions, the essence of the C recommendation has remained consistent: at the population level, the balance of benefits and harms is very close, and the magnitude of net benefit is small. Given this small net benefit, the USPSTF has either not made a recommendation “for or against routinely” providing the service (1998), recommended “against routinely” providing the service (2007), or recommended “selectively” providing the service (2012). Grade C recommendations are particularly sensitive to patient values and circumstances. Determining whether or not the service should be offered or provided to an individual patient will typically require an informed conversation between the clinician and patient.

Grade Definitions for USPSTF Recommendations after July 2012:

<http://www.uspreventiveservicestaskforce.org/Page/Name/grade-definitions#brec2>

Grade	Definition	Suggestions for Practice
A	The USPSTF recommends the service. There is high certainty that the net benefit is substantial.	Offer or provide this service.
B	The USPSTF recommends the service. There is high certainty that the net benefit is moderate or there is moderate certainty that the net benefit is moderate to substantial.	Offer or provide this service.
C	The USPSTF recommends selectively offering or providing this service to individual patients based on professional judgment and patient preferences. There is at least moderate certainty that the net benefit is small.	Offer or provide this service for selected patients depending on individual circumstances.
D	The USPSTF recommends against the service. There is moderate or high certainty that the service has no net benefit or that the harms outweigh the benefits.	Discourage the use of this service.
I Statement	The USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of the service. Evidence is lacking, of poor quality, or conflicting, and the balance of benefits and harms cannot be determined.	Read the clinical considerations section of USPSTF Recommendation Statement. If the service is offered, patients should understand the uncertainty about the balance of benefits and harms.

Levels of Certainty Regarding Net Benefit

Level of Certainty*	Description
High	<p>The available evidence usually includes consistent results from well-designed, well-conducted studies in representative primary care populations. These studies assess the effects of the preventive service on health outcomes. This conclusion is therefore unlikely to be strongly affected by the results of future studies.</p>
Moderate	<p>The available evidence is sufficient to determine the effects of the preventive service on health outcomes, but confidence in the estimate is constrained by such factors as:</p> <ul style="list-style-type: none"> • The number, size, or quality of individual studies. • Inconsistency of findings across individual studies. • Limited generalizability of findings to routine primary care practice. • Lack of coherence in the chain of evidence. <p>As more information becomes available, the magnitude or direction of the observed effect could change, and this change may be large enough to alter the conclusion.</p>
Low	<p>The available evidence is insufficient to assess effects on health outcomes. Evidence is insufficient because of:</p> <ul style="list-style-type: none"> • The limited number or size of studies. • Important flaws in study design or methods. • Inconsistency of findings across individual studies. • Gaps in the chain of evidence. • Findings not generalizable to routine primary care practice. • Lack of information on important health outcomes. <p>More information may allow estimation of effects on health outcomes.</p>

*The USPSTF defines certainty as "likelihood that the USPSTF assessment of the net benefit of a preventive service is correct." The net benefit is defined as benefit minus harm of the preventive service as implemented in a general, primary care population. The USPSTF assigns a certainty level based on the nature of the overall evidence available to assess the net benefit of a preventive service.

Grade Definitions for USPSTF Recommendations Dated After May 2007:

<http://www.uspreventiveservicestaskforce.org/Page/Name/grade-definitions#brec2>

The U.S. Preventive Services Task Force (USPSTF) has updated its definitions of the grades it assigns to recommendations and now includes "suggestions for practice" associated with each grade. The USPSTF has also defined levels of certainty regarding net benefit. These definitions apply to USPSTF recommendations voted on after May 2007.

Grade	Definition	Suggestions for Practice
A	The USPSTF recommends the service. There is high certainty that the net benefit is substantial.	Offer or provide this service.
B	The USPSTF recommends the service. There is high certainty that the net benefit is moderate or there is moderate certainty that the net benefit is moderate to substantial.	Offer or provide this service.
C	<i>Note: The following statement is undergoing revision.</i> Clinicians may provide this service to selected patients depending on individual circumstances. However, for most individuals without signs or symptoms there is likely to be only a small benefit from this service.	Offer or provide this service only if other considerations support the offering or providing the service in an individual patient.
D	The USPSTF recommends against the service. There is moderate or high certainty that the service has no net benefit or that the harms outweigh the benefits.	Discourage the use of this service.
I Statement	The USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of the service. Evidence is lacking, of poor quality, or conflicting, and the balance of benefits and harms cannot be determined.	Read the clinical considerations section of USPSTF Recommendation Statement. If the service is offered, patients should understand the uncertainty about the balance of benefits and harms.

Grade Definitions for USPSTF Recommendations Dated Prior to May 2007:

<http://www.uspreventiveservicestaskforce.org/Page/Name/grade-definitions#brec2>

A—Strongly Recommended: The USPSTF strongly recommends that clinicians provide [the service] to eligible patients. *The USPSTF found good evidence that [the service] improves important health outcomes and concludes that benefits substantially outweigh harms.*

B—Recommended: The USPSTF recommends that clinicians provide [the service] to eligible patients. *The USPSTF found at least fair evidence that [the service] improves important health outcomes and concludes that benefits outweigh harms.*

C—No Recommendation: The USPSTF makes no recommendation for or against routine provision of [the service]. *The USPSTF found at least fair evidence that [the service] can improve health outcomes but concludes that the balance of benefits and harms is too close to justify a general recommendation.*

D—Not Recommended: The USPSTF recommends against routinely providing [the service] to asymptomatic patients. *The USPSTF found at least fair evidence that [the service] is ineffective or that harms outweigh benefits.*

I—Insufficient Evidence to Make a Recommendation: The USPSTF concludes that the evidence is insufficient to recommend for or against routinely providing [the service]. *Evidence that the [service] is effective is lacking, of poor quality, or conflicting and the balance of benefits and harms cannot be determined.*
